

Session 9 : Strategies to improve quality of TVET institutions and personnel

Group 1:

+++++

Discussion:

1. Must have a MUTUAL AGREEMENT between institution/college.
2. Problem could be happened such as the arrangement of accommodation with the partner institution that makes the limitation selection of the student i.e separate dormitory between male and female; and the gender of student might not fit with the availability of the dormitory.
3. The institution have to manage clearly to get support from government and family.
4. The student exchange between country through on-the-job-training programme, there must be a competency mapping between the curriculum with the job existed in the company. If the student do not meet the requirement of the company, there must be a training course.

Lack of information for the requirement from the industry.

5. Different regulation in each country about on-the-job training; such as period of training required , visa, as well as company's support (such as allowances for the student).
6. The institution must have a signing agreement with the education institution in the country that that student will go for the job training with the industry; so the student could apply for a visa. MOE should work closely with MFA to have on-the-job-training visa.
7. There is a problem of exchange students between institutions such as different level of studying. Therefore, we should start with the competency-based exchange.
8. The variety of course studying in each country do not meet the needs of the partner institution.
9. Each country should to find similarity through the Asia Pacific Accreditation and Certification Commission (APACC).
