SEA TVET &

SEA China TVET Scholarship Booklet 2017/2018

DRAFT - October 2017
Background

In the last two decades, the global flagship agenda of “Education for All (EFA)” has taken a centre-stage along with a number of SEAMEO activities. With this agenda culminating in 2015, SEAMEO has made strides in achieving current global goals in order to set the Southeast Asian agenda beyond 2015, especially in the context of regional integration and challenges of post-2015 developments.

Having harnessed the vast experience in education for Southeast Asia in the past 50 years, SEAMEO recognises that the challenges beyond 2015 will be even more demanding. This calls for greater urgency to develop a new regional agenda that will drive SEAMEO to promote excellence in education, science and culture.

As part of this initiative, the SEAMEO Council Meeting was convened in Lao PDR in September 2014 as part of SEAMEO’s flagship projects, the SEAMEO College. The outcome of the meeting was the result of Seven Priority Areas of SEAMEO on Education to be promoted for the next twenty years (2015-2035).

Among the SEAMEO’s Seven Priorities, Priority 4: Promoting technical and vocational education and training (TVET) among learners, teachers and parents is very relevant in the context of the ASEAN Economic Community (AEC) as well as the future collaborations with China. This priority calls for more investment and relevant curricula focusing on creativity and innovation, with a clear road map to lifelong learning, improved education and regional labour mobility. In this connection, the SEA TVET and
SEA-China TVET Scholarship Project is instrumental in providing students with the opportunity to pursue their higher education in the area of TVET and subsequently producing a flexible and resilient work force well equipped with the necessary skills and key competencies. It also signifies the commitment of SEAMEO to embrace the SEAMEO New Education Agenda: SEAMEO’s Priority 4.

The first edition of TVET Scholarship Booklet 2016 was a good initiative to list down the number of countries and institutes that outline scholarship programmes. However, there were only academic institutes from Brunei Darussalam and Indonesia that were present in this booklet. In this regard, the booklet will need to be revised to reflect the other SEAMEO member countries and China as well as institutes that offer similar or related scholarship programmes. At the same time, other information relating to TVET scholarship programmes will also need to be included so the booklet is comprehensive and user-friendly.

Objectives

a) To provide students with the opportunity to pursue their higher education in the area of TVET.

b) To enhance knowledge between different countries in the region on the TVET initiatives.

c) To share the experiences of TVET among Southeast Asian countries and China so learning can be harnessed and capitalized.
Expected Outputs

a) A comprehensive directory of SEA TVET and SEA-China TVET scholarship booklet updated with names, criteria for scholarship, target groups, etc. listed in the directory.

b) Students or academic institutes can make use of this directory to search for the TVET scholarships.

c) SEAMEO member countries, China and partners can utilize this booklet to have an overview of TVET scholarship available in the region.

Participants and Stakeholders

a) Academic institutes who wish to exchange information on their TVET scholarship programmes.

b) Teachers who can apply the knowledge on the courses of TVET available in other academic institutes.

c) Students who wish to apply for the TVET scholarship programmes in other countries.

d) Researchers who want to have secondary data on TVET scholarship programmes in the region.

Profile

Henan University of Urban Construction (HUUC) is the only provincial level university in Henan Province specializing in engineering and characterized by urban construction. HUUC, one of the only two universities in China named with “urban construction”, has constructed a mutually supportive, coordinately developing disciplinary system. Founded in 1983, HUUC can be traced back to Henan Urban Construction College. In March 2002, with the approval of the Ministry of Education, it became Henan University of Urban Construction.

Profile

With the advanced educational facilities and good learning environment, our institute occupies more than 14 hectares with construction area reaching 480,000 square meters. On the beautiful campus, the experimental and training area totally reaches 2.55 hectares and 187 workshops and labs. The Institute uniting 81 water conservancy enterprises and state-owned units and 13 water conservancy vocational colleges has established China Water Conservancy Vocational Education Group supported by China Water Conservancy Vocational Education Association, building a managerial platform featuring the cooperation between educational units and enterprises.

During the vicissitudes of more than 80 years, over 100 thousand skilled talents graduated from the Institutes and made their name throughout the whole country. The previous Water Resources Minister Yang Zhenhuai praised it as the “the Cradle of Technical Elites for Yellow River Water Conservancy”, and Li Guoying, the previous chief of Yellow River Conservancy Commission, during his inspection in the institute once said: “There would be no saying of the more than 50 years peace of Yellow River without Yellow River Conservancy Technical Institute”.
