

CONCEPT NOTE

(<http://seatvet.seameo.org/news/24>)

1. Background

All Southeast Asian countries have positioned Technical and Vocational Education and Training (TVET) in the mainstream of education systems and setting it as a priority in their education agenda in view of the fact that this type of education plays an important role in the socio-economic development of a nation (Paryono 2013). In addition, TVET has been identified as one of the seven priority areas in education in Southeast Asia, which was agreed at the Strategic Dialogue of Education Ministers (SDEM) meeting in September 2014.

In response to the Southeast Asian regional directions agreed at the 1st High Officials Meeting on SEA-TVET in Thailand, May 2015 - to promote the internationalisation of TVET institutions, to improve the student mobility, and to leverage the global competitiveness and 21st century skills of TVET students in Southeast Asian countries, the Southeast Asian Ministers of Education Organization (SEAMEO) has spearheaded to develop the **SEAMEO Polytechnic Network** in April 2016 as a part of SEA-TVET Consortium.

The SEAMEO Polytechnic Network aims to enhance internationalisation and partnership of TVET institutions (colleges, polytechnics and university of technologies) in the Southeast Asian region through **cross-country student exchange programme and other collaborations**.

To improve the number of TVET student mobility across the region, the High Officials' Round Table Meeting of the 3rd High Officials Meeting on SEA-TVET, hosted by the Ministry of Education of Malaysia in May 2017 recommended the SEAMEO Secretariat to serve as a "**Coordinating Agency**" (One Stop Service Unit) to facilitate the implementation process of TVET student exchange through internship programme, starting from organizing a meeting, seeking commitment from institutions, mapping students, producing guidelines, facilitating interview, evaluation and certification.

2. SEAMEO Polytechnic Network Meeting as for TVET Student Internship Exchange

Since 2017, the SEAMEO Polytechnic Network Meetings have been organized at least 2 times a year as a platform to discuss with TVET institutions for seeking commitment and implementation process of the SEA-TVET Student Internship Exchange Programme.

The objectives of the SEA-TVET Student Internship Exchange Programme are as follows:

1. To enhance global competitiveness, knowledge and technical skills of TVET students
2. To improve inter-cultural understanding, regional perspectives, and English communication of TVET students
3. To provide employable opportunities for TVET students
4. To create a sustainable partnership among polytechnics and TVET colleges/institutions in Southeast Asia.

During July 2017-September 2018, the SEA-TVET Student Internship Exchange Programme has been implemented for **2** batches with the total number of **289** TVET students exchanged through internship programme for 30 days. The implementation is based on a cost sharing basis among the participating institutions and parents.

The 1st Batch of TVET Student Internship Exchange programme was participated by 55 students from 12 institutions in Indonesia, Philippines, Thailand and Vietnam. The programme was successfully implemented in January and February 2018 for 30 days.

The 2nd Batch of SEA-TVET Student Internship Exchange Programme is currently started in August, September and October 2018 for 30 days. 234 students** from 49 institutions in Indonesia, Philippines, Thailand, Malaysia and Vietnam are enthusiastically attending this programme. (See details in Appendix A)
