The Issues

The collaboration of Asian, it makes the good understanding not only the students but also the teachers and the administrators.

The students gains the new experiences, knowledge and skills “How do you live in the foreign countries?”
They can adapt themselves in inter-cultures understanding, about food and lifestyle of people who lives there.

They improve English Communication of TVET students.

They have met many friends in the host countries. It will be good friendship in the future.

The important things: they know how to work in the place not in their own countries.

During the exchange period, the students run their work very well.

If they did not understand anything or made some mistake, they would ask to improve themselves.
The problems:

The workplace are unwilling to receive the students Internship Exchange only one month. They want up to 3 months or more.

If the institution did not contact the partnership first, it is not convenient.

Conclusion:

The 2nd Batch of SEA – TVET student Internship Exchange Programme was successful.

However, the problems can be finally solved.
